REMOVING YOUR OLD LAVATORY / CÓMO QUITAR SU LAVABO ANTIGUO / ENLÈVEMENT DE VOTRE VIEUX LAVABO

Be sure to close the faucets before you turn on the main valve again. Disconnect the drain pipes. Take off as many sections as possible between the lavatory and the wall or floor to facilitate removal. Place a basin under the work area to catch any water that may still be in the drain.

Asegúrese de cerrar los grifos antes de volver a abrir la válvula principal. Desconecte los tubos de drenaje. Quite tantas secciones como sea posible entre el lavabo y la pared o el piso para facilitar la remoción. Coloque una palangana debajo del área de trabajo para recoger el agua que aún pueda estar en el desagüe.

Assurez-vous de fermer les robinets avant d'ouvrir à nouveau la vanne principale. Débranchez les tuyaux de vidange. Enlevez autant de sections que possible entre les toilettes et le mur ou le sol pour faciliter le retrait. Placez un bassin sous la zone de travail pour récupérer l'eau qui pourrait encore se trouver dans le drain.
