

QUALITY & CONSTRUCTION

A SOLID FOUNDATION FOR YOUR BATHROOM

Solid construction and reliability are important aspects to consider for your bathroom. Bathroom vanities endure many conditions such as moisture, stress, and daily physical interactions. The vanity you choose starts with a strong, solid foundation.

Virtu USA vanities feature 2-inch solid wood framing, which not only provides structural integrity, but also durable support with even the heaviest natural stone countertops. Every Virtu USA vanity has the craftsmanship you expect to see and feel.

QUALITY & CONSTRUCTION

2-INCH SOLID WOOD FRAMING

Durable construction featuring 2-inch solid oak wood framing from top to bottom, and reinforced with corner brackets for strength.

1/2-INCH HARDWOOD PANELS

Strong hardwoods for all panels, doors, and drawers.

QUALITY & CONSTRUCTION

LASTING ALL-WOOD CONSTRUCTION

All Virtu USA vanities come with drawer handles and door knobs (removed here). Pre-drilled holes allow you to easily change your design.

Rear plumbing cover with plumbing cutouts (cover removed to show accessibility).

QUALITY & CONSTRUCTION

HARDWARE & SAFETY

Supporting the solid foundation, we have carefully chosen quality hardware for our vanities. Our drawers and doors all come standard with soft-closing mechanisms that are both convenient and act as safety features.

HEAVY DUTY DRAWERS

All drawers are pre-installed with heavy duty soft-close rails. Integrated clips for easy removal of drawers for cleaning.

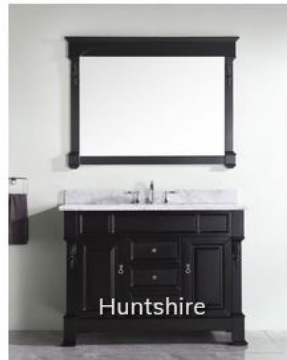

ALL SOFT-CLOSING

All doors and drawers are pre-installed with soft-closing hardware. This is our standard (not an industry standard). Be at ease with the added quietness and reliability of your vanity.
