

▶▶ Product Information

▶▶▶ ETL and UL – Testing, Inspection and Certification

- Both are independent non-profit labs — not government agencies or government funded
- ETL is the largest worldwide
- UL is the largest in the USA
- Both are Nationally Recognized Testing Laboratories (NRTL) as recognized by OSHA
- Both are recognized by local inspectors throughout North America
- No mark is better than the other

Tresco Products Tested and Certified for Canada and the United States

ETL or UL marks serve as proof of product compliance to Canadian and U.S. standards. When products bear these marks, it indicates to the consumer that the products have passed a complete and thorough set of tests and certification requirements.

All TRESKO® lighting systems are registered and certified by ETL and/or UL. In addition, a majority of our individual lighting components (lights, power supplies, and accessories) are also registered and certified by ETL and/or UL.

UL's Recognized Component Mark

The UL Recognized Component Mark is used on components that are a part of larger products or systems. It is certified by UL to both Canadian and U.S. requirements.

CE Mark

CE Marking permits a product to be sold throughout the European Union. It is a conformity mark noting the product complies with all applicable European Directives.

* The ETL Mark is a registered trademark of Intertek.
The UL Mark and Recognized Component Mark are registered trademarks of Underwriters Laboratories Inc.
All product dimensions and specifications are subject to change without prior notice.
