

597 Tray Divider

Installation Instructions

Required Tools: Phillips head screwdriver, pencil.

Step 1 - Hole Locations

Place tray divider in cabinet and mark locations for mounting clips with a pencil. Locations can be determined by utilizing the diagram.

Note: Ensure that the tray divider is perpendicular to the cabinet floor and that the rear of the tray divider is flush with the rear cabinet wall.

Step 2 - Installing Mounting Clips

Place tray divider clips on marked locations and mount using provided screws.

Step 3 - Fastening Tray Divider to Clips

Place tray divider on clips and press fit to lock tray divider in place. Your installation is now complete.
