Bolden™ Single Handle Pull Down Kitchen Faucet

KPF-1610

Prior to Installation:

- Make sure you have all necessary parts by checking the diagram and parts list.
- Turn off the hot and cold water supply at the angle stops and turn on the old faucet to release any built up pressure. Remove existing faucet. Clean sink or countertop to remove any debris, plumber's putty, or silicone.
- Flush angle stops to release any debris prior to installation.
- Pre-drilled hole size requirement: 1 3/8" (min)
- Max countertop thickness: 13/4"

Tools Required

- F. 2.5mm Hex Wrench
- G. 2.2GPM Flow Restrictor (BLACK)

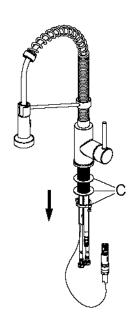

Faucet Dimension

Installer Tip:

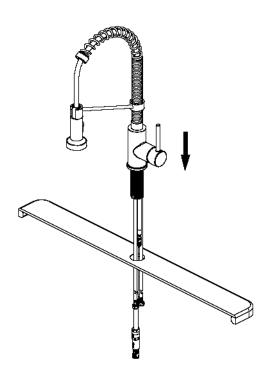

Shut off main water supply before installing new faucet.

Step 1. Remove mounting hardware

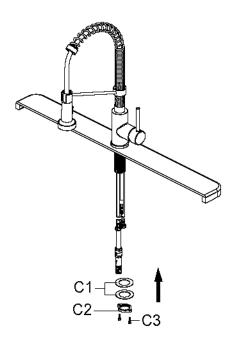

Shut off the water supply. Remove the old faucet. Clean the mounting surface. Remove mounting hardware (C) from faucet body (B).

Step 2. Installing the faucet assembly

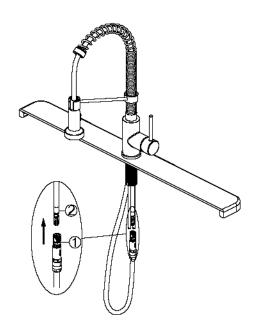

Optional No Escutcheon Installation. Insert faucet body through the hole in the sink.

Step 3. Securing the faucet assembly

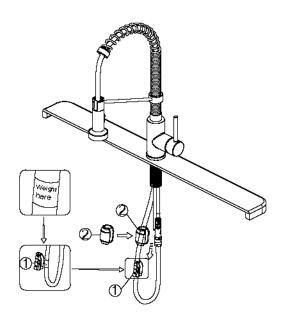

Install the rubber washer and metal washer (C1) onto the threaded mounting shank.
Thread the nut (C2) onto the mounting shank. Lock the nut (C2) into position by tightening the screws (C3). Do not overtighten.

Step 4. Securing the faucet assembly

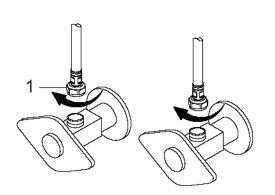

Push the quick connector (1) firmly upward and attach it to the receiving block (2). Pull down moderately to ensure the connection has been made.

Step 5. Securing the faucet assembly

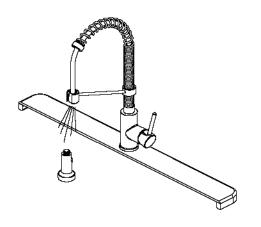

Install the weight clip (1) at the point of the hose marking "weight here". Insert the weight (2) onto the clip (1) by sliding it down onto the clip (1).

Step 6. Making the waterline connections

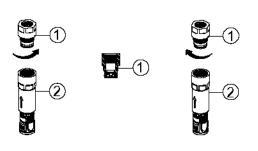

Thread the nut (1) on the supply line onto the outlet of the water supply valve and tighten with a wrench. Do not overtighten.

Step 7. Flushing and checking for leaks

Pull the hose assembly out of the spout and remove the spray head by unscrewing it from the hose in a counterclockwise direction. Be sure to hold the end of the hose down into the sink and turn the faucet on to the warm position where it mixes hot and cold water. Flush the water lines for one minute. This flushes away any debris that could cause damage to internal parts. Check for leaks. Re-tighten any connections if necessary, but do not overtighten. Reinstall the spray head by hand tightening it back onto the spray hose. After installation is completed, turn on the hot and cold water supplies. Check for leaks.

Step 8. Flow Regulator Replacement

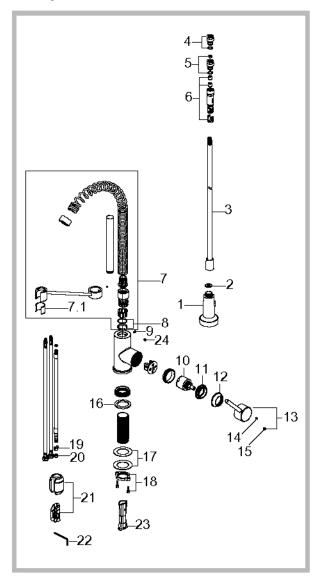

This faucet ships with a (WHITE) 1.8 GPM flow restrictor installed. An optional (BLACK) 2.2 GPM flow restrictor is also included in the box.

Flow Rate Modification:

- 1. Disconnect the quick connect (2) and unthread the (1-WHITE) flow restrictor.
- 2. Replace with the 1.8 GPM restrictor (1-WHITE) with the 2.2 GPM restrictor (1-BLACK).
- 3. Reinstall the quick connect assembly.

NOTE: In compliance with CEC standards, this faucet is designed with a 1.8 gpm flow rate. At your discretion, you may modify the product with the included 2.2 gpm restrictor. Please note that doing so will remove the capability of this product to meet specific low-flow standards. Kraus is not liable for any alterations made to the product post-sale, and highly advises that you consult with your local or statewide plumbing enforcement agency prior to any modification.

Replacement Parts

*Denotes spray hose assembly color options: Spray hose assembly color options: Black hose w/ Brushed Gold connector (BLBG), Black hose with Spot-Free Stainless connector (BLSFS), Gray hose with Chrome connector (GRCH), Gray hose with Spot-Free Stainless connector (GRSFS)

Trouble-Shooting

If you have followed the instructions carefully and your faucet still does not work properly, take the following corrective steps:

PROBLEM	CAUSE	ACTION
Leakage under faucet handle	Bonnet nut (11) has come loose	Remove the cover button (15). Loosen set screw (14) with hex wrench (22). Remove the handle. Unscrew cap (12). Tighten bonnet nut (11) with an adjustable wrench.
The aerator has an irregular or reduced water flow	The aerator is dirty or mis-fitted	Remove the aerator and check for debris. Ensure that the rubber washer is properly installed.
The water pressure is low.	The connector underneath the deck is clogged with debris The aerator is clogged	Turn off the water supply and disconnect the connector / aerator. Unscrew the connector / aerator and clean under running water. Screw the connector / aerator back. Test water flow. If water pressure is still low then replace the connector / aerator.
There is a low flow of water.	The screen filter in the hose connectors is dirty.	Turn off the water supply at water valve and unscrew the hose connectors from water supply lines. Clean the screen in the water lines with hot water, removing any debris or calcium build up.

Care & Maintenance

To keep the product clean & shining, follow the steps below:

- 1. Rinse with clean water & dry with a soft cloth
- 2. Do not clean with soaps, acid, polish, abrasives or harsh cleaners
- 3. Do not use cloth with a coarse surface
- 4. Unscrew the aerator and clean when necessary

This installation manual is subject to change without further notice.

Codes/Standards Applicable:

ASME A112.18.1 1.8GPM 6.8L/min maximum

FAUCET WARRANTY

Kraus products are manufactured and tested to the highest quality standards by Kraus USA Inc. ("Kraus").

Kraus extends this warranty to the original purchaser for personal household use of the "Faucet" in its original location. The warranty is non-transferable.

Kraus warrants the structure and finish of the product to be free from defects in material and workmanship under normal usage for the lifetime of the product. The warranty commences from the initial date of purchase by the owner or trade professional, from an authorized Kraus dealer, through the lifetime of the original owner or end-user.

Kraus warrants the mechanical components such as but not limited to sprayhead assembly (includes engine, aerators, structure, restrictors, back flow preventers, sprayer hoses, braided supply line hoses which encompasses nylon, silicon and stainless steel,etc) of the product to be free from defects in material and workmanship under normal usage for a period of one (1) year. The warranty commences from the initial date of purchase by the owner or trade professional, from an authorized Kraus dealer, through the one (1) year term of the original owner or end-user.

Kraus warrants the mechanical component (cartridge) of the product to be free from defects in material and workmanship under normal usage for a period of five (5) years. The warranty commences from the initial date of purchase by the owner or trade professional, from an authorized Kraus dealer, through the five (5) year term of the original owner or end-user.

Any product reported to the authorized dealer or to Kraus as being defective within the warranty period will be repaired or replaced with a product of equal value at the option of Kraus. This warranty extends to the original owner or end-user, and is not transferable to a subsequent owner.

RESTRICTIONS

This warranty does not cover antediluvian, discontinued, or display products, whether such items are purchased at discount outlets, unauthorized dealers, and/or sold on clearance.

This warranty does not cover instances of negligence, misuse, abuse, improper installation, carelessness, accident, hard water or mineral deposits, exposure to corrosive materials, misapplication, damages caused by improper maintenance, alteration of the product, or failure to follow care or installation instructions enclosed with your product. Avoid using abrasive cleaners such as powders, bleach, ammonia, alcohol, or chlorine. Avoid using abrasive pads, steel wool, or wire brushes, as these will damage and wear down the finish.

This warranty does not apply to Products that have not been installed or operated in accordance with instructions supplied by Kraus and all applicable rules, regulations, and legislation pertaining to such installations.

This warranty does not apply unless the Kraus product is installed by a fully insured and licensed trade professional. Kraus insists that such professionals have experience in the installation of bathroom and kitchen manufactured goods.

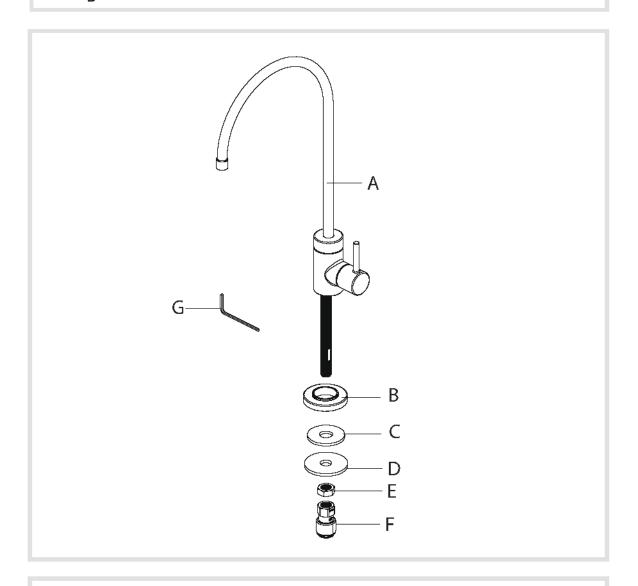

This warranty does not cover labor charges or costs of removal and reinstallation of said product. This warranty does not allow recovery of incidental or consequential damages, such as loss of use, delay, property damage, or other consequential damages, and Kraus accepts no liability for such damages.

This warranty does not cover Marine or Outdoor Installation.

Diagram and Parts List

- A. Faucet Assembly
- B. Flange
- C. Rubber Washer
- D. Metal Washer
- E. Mounting Nut
- F. Connector
- G. Hex Wrench

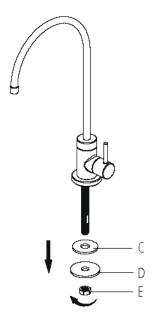

Faucet Dimension

Installer Tip:

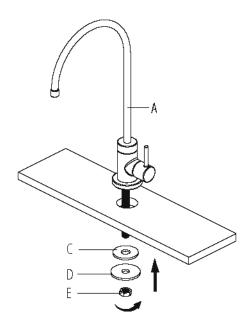

Shut off main water supply before installing new faucet

Step 1: Preparing for installation

Remove the rubber washer (C), metal washer (D), and mounting nut (E) from the end of the stud.

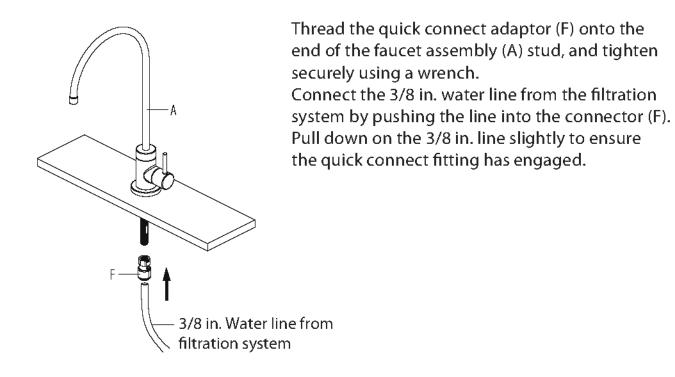

Step 2: Installing the faucet assembly

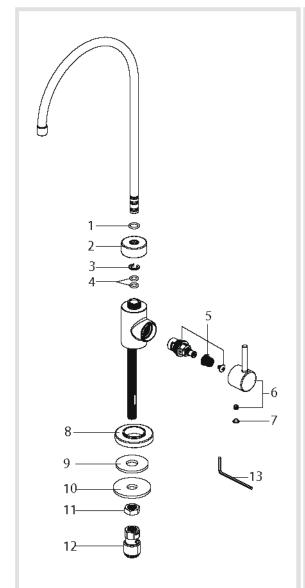

Place the faucet assembly (A) through the selected hole in the sink or countertop. On the underside of the sink or countertop, slide the rubber washer (C) and metal washer (D) onto the stud.

Thread the mounting nut (E) onto the stud, and tighten securely using your wrench.

Step 3: Connecting the quick connect adaptor and water line
