Advantages of a Whitehaus Collection Fireclay Sink

The fireclay sink takes on a new life as it moves into the 21st century.

No longer confined to the farmhouse, it has become a distinctive design statement in any kitchen, bathroom, or laundry room because they are attractive, durable, stain resistant, and spacious. Whitehaus Collection® Farmhaus Fireclay Sinks are available in a wide variety of styles to suit any decor.

What is Fireclay?:

Fireclay is a natural clay, a variation of vitreous china that has greater amounts of quartz and feldspar (minerals). It is denser, thicker, and approximately 30% heavier than regular clay. These characteristics allow for a durable, smooth, flat surface on large fixtures not attainable with standard vitreous china.

The Quality of the Finish:

The A+ grade extra-thick Whitehaus Collection® Farmhaus Fireclay Sink glaze provides both durability and shine for the lifetime of the sink. Our specially formulated glazing process ensures that your sink is stain/scratch resistant and impervious to threatening bacteria from food preparation. Thermal Shock (extremely hot or cold water) has no effect on the sink.
