

UNDERMOUNT INSTALLATION INSTRUCTIONS

This sink is specifically designed to be under-mounted in a solid surface countertop only.

CAUTION: Sink edge may be sharp; handle with caution.

1. Cut out countertop using template.
2. Determine placement of clip brackets as indicated. Pre-drill holes according to desired method based on countertop material.
3. Apply a bead of Silicon evenly along edge on underside of countertop.
4. Position and align sink over opening. Press sink onto silicon seal.
5. After re-checking alignment. tighten clip brackets against sink edge.
6. Remove excess silicon.
