

Rack It Up!

Bookshelf Pot Rack

THANK YOU VERY MUCH!

We sincerely appreciate your purchase of this kitchen/cookware storage product from Enclume Design Products, Inc. Enclume is America's foremost producer of premium-grade cookware racks.

This pot rack is strong and easy to assemble. It is also the easiest ever to install with new-technology DRYWALL anchors! We want you to enjoy it for many years to come. Please don't hesitate to contact us if you have questions or need assistance.

IMPORTANT!

Enclume is committed to the highest quality in the manufacture of this **RACK IT UP** pot rack. Each product has been carefully inspected before shipment.

However, in case there is a problem, PLEASE LET US HELP YOU FIRST. Do not return the item to the location where you purchased it. Call us and explain what is missing or wrong. We will do our best to help with any question or problem you have—and as fast as possible.

How To Assemble Your Pot Rack

TIP! SAVE TIME AND HASSLE. PLEASE READ ENTIRE INSTRUCTIONS BEFORE BEGINNING ASSEMBLY.

PAINTABLE - Want a different color? The finish on this pot rack can be spray painted any color. We recommend Rustoleum "Hammered" colors for their metal-like finishes, however any quality spray-can paint may be used. See a paint retailer for guidance

TOOLS NEEDED - We provide all tools required for assembly: hex wrench, fastener hardware (nuts, bolts). Note under installation instructions on green insert the tools you will need to provide.

Item No.	Description	Qty.	Item No.	Description	Qty.
3A	Side bar 4 though holes	1	28A	Barrel Bolt	4
3D	Back bar 2 through 2 tap holes	1	28B	Barrel Nut	4
7B	Grid bracket for bookshelf	3		Installation hardware	
8B	Grid 8"	1	19C	Button head bolt 1/4 x 20 x 2"	2
9	Bookshelf end piece	2	26A	Hex wrench	2
18A	1/4" Button head 1/4 x 20 / 1/4"	2	27A	Toggle	2
22	Bookshelf curved arm (long)	2	30A	Wall Screw	2
25A	Pot hook Straight	4	30B	Wall Sleeve	2
25B	Pot Hook angled	4			

TIP! FIRST, REMOVE PAINT FROM BOLT HOLES. Because the powder coat finish applied at the factory also adheres to the inside of bolt holes, pushing a bolt through it during assembly may be difficult. Therefore, before connecting parts, we recommend that you check to see that bolts slip easily through all holes. If they do not, carefully clear paint from holes in side bars, ends and arms using a small knife.

SECOND, be certain that barrel nuts and bolts screw together easily **BEFORE** beginning assembly. Residue from the black finish may cause some bolts to stick a bit, therefore use the two hex wrenches enclosed (one for each end of the barrel) and screw them together to clear away extra paint.

STEP 1: LAYOUT PARTS

On a table lay out all parts as shown in the exploded view above.

STEP 2: CONNECT MAIN BODY PARTS

TIP! It is easiest to attach the pot rack parts when you insert the barrel nut (28B) from the **INSIDE** of the pot rack body, then screw the barrel bolt (28A) into 28B from the **OUTSIDE**.

Temporarily connect two ends (9) and two side bars(3A) by inserting a barrel nut and bolt (28A, 28B) through the top hole at each of four corners. This will cause body of pot rack to stand on edge. Be certain side bar (3A) is on the **INSIDE** when connected.

IMPORTANT: At this time you will **NOT** connect back bar (3D) to the body. It will be attached when the pot rack is installed on the wall. However, at this time screw two button head bolts (18A) into lower screw holes simply to cover them.

STEP 3: ATTACH FIRST ARM

TIP! It is easiest to attach arms when the corner of the pot rack to which you are connecting the arm hangs slightly past the edge of the table. That provides clearance for the flared end that extends below the body of the rack.

Now remove the barrel bolt (28A) from one of the corners, keeping barrel nut (28B) in position. Place a curve arm (22) (2-hole end) on the OUTSIDE of the body. Align the three pieces (side bar 3A) on inside, end piece (9) in middle, arm (22) on outside) and reinsert the barrel bolt (28A) through the upper hole from the OUTSIDE.

Repeat for lower hole. Do not tighten barrel bolts firmly until all bolts are in place.

STEP 4: ATTACH OTHER ARM

Repeat STEP THREE for remaining arm.

STEP 5: LEVEL POT RACK ON TABLE

Place assembled rack squarely on table and adjust all parts to be certain they are level and straight. Then tighten all bolts firmly.

STEP 6: MEASURE FOR WALL

After the bookshelf rack is squared and tightened, the distance from the center of holes at top of arms to center of upper hole in back bar is 9 3/4". The width between upper holes is 20-3/4". The width between lower holes is also 20-3/4" (see diagram A at bottom of GREEN insert). Use these measurements when determining location of rack on wall in installation section below.

NOTE: Grid and brackets will be added AFTER the rack is attached to the wall.

You're now finished and ready to attach to the wall!

How to Attach Your Pot Rack to the Wall

TOOLS NEEDED FOR INSTALLATION:

Provided: Installation hardware (anchors, bolts, wall screws and sleeves)

You will need: level, tape measure, pencil, electric drill and 1/2" and 3/16" drill bits, hammer and nail

STEP 1: LOCATION

Decide where you want to place your pot rack. We suggest a location near your stove, sink or food preparation area. Also consider the height of the wall where the pot rack will hang, keeping in mind how far below the rack your pots and utensils will hang, plus how high above your head you can still easily reach cookbooks, etc. stored on the grid.

On the wall, mark the four points 20-3/4" long by 9-3/4" high where the top of rack arms and back bar will attach. Then tap a small nail through each mark to be certain a joist is not in the way. (NOTE: because your pot rack includes super-strong new-technology anchors, you DO NOT need to locate and bolt to studs. See more info under STEP 2 below.)

STEP 2: INSTALL DRYWALL ANCHORS

First, here's important information about our anchors. *RACK IT UP*'s new-technology DRYWALL anchors eliminate the need to bolt your pot rack to a stud. The steel anchors are very strong and when installed in drywall each drywall anchor holds about 200 lbs. Two anchors hold about 400 lbs., many times the weight you will likely hang from your pot rack.

Plus, since you no longer have to consider the location of a stud which usually determines where your rack has to be installed, you can position it in drywall anywhere you want!

See GREEN insert page for Toggle instructions. Follow Steps 1-6, then Step 7 which is specifically for the Bookshelf Pot Rack.

CLEANING

Your pot rack has a durable powder coat finish designed to provide years of protection. Cleaning is done easily using soap and a damp cloth. Dry thoroughly after cleaning.

ACCESSORIES

These handy add-ons enhance your pot rack.

8 Pot Hooks

There's always a need for extra hooks. Set of eight hooks (4 straight, 4 angle). Steel with powder coat finish for extra durability.

RACK IT UP! 5-Year Limited Warranty

This product is warranted to be free of material defects for a period of five years from the date of purchase. Customer's exclusive remedy shall be the repair or replacement of the defective product and shall be subject to the following conditions: (1) notice of any defect is received by Enclume within the warranty period and (2) customer returns the defective product to Enclume Design Products, Inc.

THERE ARE NO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. ENCLUME SPECIFICALLY DISCLAIMS ANY AND ALL INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE PURCHASE, INSTALLATION OR USE OF ENCLUME PRODUCTS.
