User's manual for cleaning the steam generator

Using steps: Turn off the power first, and then open the lid of cleaning cup, put the cleaning liquid in the cleaning cup, after that, cover the lid back. Now turn on the power, start the steam function to make the self-cleaning function work, later turn off the power, and pipe water away.

1).Power off

For safety, it is strictly prohibited to open the lid of the easy cleaning cup during using. In order to avoid steam gas emits out and scald users, please shut down all other functions before using the steam generator  cleaning function. (As picture 11)

2).Open the easy cleaning cup

After Making sure all of functions are turned off, find out the cleaning cup according the right picture illustrated, and rotate the lid of the cleaning cup to the reverse direction, and then take the lid out slightly. (As picture12)

3).put the cleaning liquid

After opening the cleaning cup, use a spoon to take a proper amount of cleaning liquid, such as Citric acid, or neutral compound cleaning liquid (around 5 ml) to put in the cleaning cup. Note: If the cleaning material is solid, first, please dissolve it with water to prevent blocking. Strictly prohibit to use any other acid, alkaline compounds to be poured into the cleaning cup directly(As picture13).

4).Cover the lid

After adding the cleaning liquid, cover the lid back and turn it in clockwise direction to fasten, like this can prevent the steam emitting out to scald users(As picture14).

5).Turn on and start the steam function

After covering the lid, press  to turn on the steam generator function, and the system  will begin to clean the steam box automatically.(As picture15)

6).Turn off the power and drain out the waste water

After 5-10 minutes, press the  to turn off the steam generator, then press the  the waste water will be drained out automatically(As picture16).
