ACRYLIC

BUILT BETTER, TO LAST LONGER

Delivering amazing, unique, designer products to our customers is our goal and our passion at Valley Acrylic. We strongly believe that for every person there exists a luxury bathroom that fits them perfectly and we see it as our personal responsibility to help them realize that dream!

At Valley Acrylic, we create stylish, long lasting designer products tailored to our customers individualistic needs. With a focus on Canadian quality, innovation, and environmentally friendly product lines, we provide the international bath market with hand crafted functional art.

LAYERED TECHNOLOGY PROCESS

Valley's crack resistant acrylic is one of the most durable, long lasting materials on the bath market today. Valley Acrylic sources high quality acrylic sheets with colour extending through the entire 3mm thick material; ensuring that your product never fades or blemishes for as long as you own it.

Our Bathtub and Shower acrylic products are reinforced with a back coating with a proprietary fiberglass and resin mixture; backed by real Canadian wood, and another layer of our proprietary mixture. This adds additional strength and rigidity to your product; ensuring that it is high resistant to the rigors of everyday use. Using our layering techniques we have created a unique product that increases heat retention; saves energy/water and amplifies the bathing experience.

Besides strength, and longevity, Valley's acrylic products are cost effective, easy to install, and highly resistant to build-up of mildew and bacteria.
